

CL Challenger Lifts

Why Choose EnviroLift™?

- » EnviroLift™ cassette-style inground lifts available in a Traditional Electric/Oil operated lift

or

New Air/Water operated lift with patented AquaVantage™ Technology, a realGREEN™ energy efficient solution.

- » Lifts are fully contained in a sealed polymer housing (made from recycled plastic) to protect your investment and the environment.
- » Maximizes the number of service bays to increase revenue potential (inground lifts have a smaller footprint than surface mounted lifts).
- » Universal prekit provides versatility for your lifting capacity needs, accommodates 10,000 / 12,000 and 15,000 capacities.
- » Eliminates the risk of vehicle door damage (no columns or overhead obstructions).
- » Creates a professional showroom style appearance with its open, aesthetically pleasing design.
- » Features a convenient incremental air actuated lock system to raise vehicle at technician's ergonomic working height to minimize fatigue and increase productivity.

Models available in 10,000 / 12,000 and 15,000 lb. capacity with many accessories to choose from.

EnviroLift™ Accessories

Bench Mounted Controls Part#: BMC

- » Provides sleek professional showroom style service facility
- » Easily mounts to many of the major workbench manufacturer's configurations
- » Easy access 3 button control includes raise, lower and lock release functions

Consult factory for specifics.

Stay Dry™ inground lift preventative maintenance system

Stay Dry is an automatic preventative maintenance tool which is pneumatically powered off of the existing internal air supply line. As the lift operator disengages the air actuated safety locks to lower the lift, an internally mounted flojet pump quietly removes any accumulated condensate from the floor of the lift containment system out through the hydraulic chase tube.

Part#: SD100

Features:

- » Automatically displaces condensation from tub bottom when lift is lowered
- » Can easily be retrofitted to older lift models and competitive brands
- » Eliminates costly maintenance calls and lift downtime
- » Prolongs the life of the inground lift and its hydraulic components

EnviroVAC™ CASSETTE LIFT EVACUATION SYSTEM

Part #: EVAC1

Should liquid ever accumulate in the bottom of your cassette lift, EnviroVAC Cassette Lift Evacuation System will help protect your investment and minimize expensive service calls by giving you the ability to easily remove unwanted liquid into a 16 gallon container.

- » A powerful air driven pump allows quick liquid removal
- » Container easily rolls to a quick-connect evacuation hose next to power unit
- » Container incorporates a drain valve to conveniently dispose evacuated liquid
- » Retrofits with other cassette lift models, including competitive brands

For more information, contact your Authorized Challenger Lifts Distributor.

Part#: 10313

Part#: 10317

Part#: 10315

Part#: 10318

Part#: StayDry

Part#: BMC*

Part Number	Description
10313	Two 6" Stack Adapter Extensions
10315	Stack Adapter Kit - includes four 3" Stack Adapters, two 6" Stack Adapters, and two Organizer Racks with mounting hardware
10317	Reducer Bushing Kit for use with 10318 on 15k / 18k lb. capacity lifts (set of four)
10318	Frame Engaging Adapter Kit for inground lifts (set of four)
SD100	StayDry automatic liquid evacuation device
EVAC1	Manual liquid removal drum
BMC	Bench Mounted Controls* (Add BMC to model at time of lift order)

*not available on the AquaVantage series or CS1520.
