

CL Challenger Lifts

Why Choose EnviroLift®?

- » Available in a Traditional Electric/Oil operated lift and Challenger's exclusive, patented AquaVantage™ Air/Water operated lift for a realGREEN™ energy efficient solution.
- » Lifts are fully contained in a sealed polymer housing made from recycled plastic to protect your investment and the environment.
- » Maximizes the number of service bays to increase revenue potential - inground lifts have a smaller footprint than surface mounted lifts.
- » Universal prekit provides versatility for your lifting capacity needs, accommodates 10,000 / 12,000 and 15,000 capacities.
- » Eliminates the risk of vehicle door damage since there are no columns or overhead obstructions.
- » Creates a professional showroom style appearance with its open, aesthetically pleasing design.
- » Features a convenient incremental air actuated lock system to raise vehicle at technician's ergonomic working height to minimize fatigue and increase productivity.

Models available in 10,000 / 12,000 and 15,000 lb. capacity with many accessories to choose from.

EnviroLift® Accessories

Bench Mounted Controls

- » Provides sleek professional showroom style service facility
- » Easily mounts to many of the major workbench manufacturer's configurations
- » Easy access 3 button control includes raise, lower and lock release functions

Part#: BMC
For CS1020 and CS1220 Electric/Oil lift models only. Consult factory for specifics.

Stay Dry™ inground lift preventative maintenance system

- » Internal mounted flojet pump automatically displaces condensation from tub bottom out through a hydraulic chase tube each time the lift is lowered
- » Easily retrofits to older lift models and competitive brands
- » Eliminates costly maintenance calls and lift downtime
- » Prolongs the life of the inground lift and its hydraulic components

Part#: SD100AV
For AquaVantage Air/Water lift models.

Part#: SD100
For CS1020, CS1220 and CS1520 Electric/Oil lift models.
