NEW PRODUCT

Custom Wide-Frame Lift Footpads

Challenger Lifts is proud to announce our custom B2280PR footpads, designed specially to accommodate the NEW 2019 Chevy Silverado and GMC Sierra trucks.

The trucks' new frame is wider in the front at the factory-recommended lift points. Challenger Lifts has designed new footpads with extra-wide heavy-duty polyurethane for ample surface area to protect the new truck's frame. The drop-in footpad design makes switching simple and quick. Our telescoping feature provides simple access to lift points.

Footpads are sold in a pair (B2280PR), and two are required per lift. They can also be used on current model trucks as well as on the new 2019 models.

For more information, please call 1-800-648-5438.

Wide-Frame Footpads fit ...

The **B2280** footpad fits all current Challenger Lifts **9,000 lb.**, **10,000 lb.**, and **12,000 lb. 2-post surface mounted lifts**, and Challenger Lifts **10,000 lb.** and **12,000 lb. inground cassette lifts**. Set of two pads per lift is required (B2280PR).

Legacy Fitment
