

3.3K LIFT TABLE

MODEL # BT3300

The BT3300 is a full-rise, dual-scissor lift table; its 3,300 lb. capacity will handle the variety of battery packs found in today's Electric Vehicles, like the Hummer's® 2,923 lb. pack. **The pallet-jack-style handle provides stability while raising or lowering without the need to walk around and lock caster wheels.**

This Lift Table comes standard-equipped with features designed to help your technicians safely and efficiently service EVs, such as a **side-shift top plate with 6° of angle adjustment and threaded holes for adapters.**

Extend the top plate to gain an additional 12³/₁₆" for larger battery packs.

Keeps your equipment operating safely and productively.

Provides easy maneuverability and stability while lifting or lowering.

Allows you to move the top plate side to side for easier alignment when installing battery packs.

Storage tray for tools and mounting hardware.

Plugs into any 110v receptacle; comes standard with 20' power cord.
